HEDGE-PLANTS,

OFFERED BY

THE READING NURSERY,

JACOB W. MANNING, Proprietor.

READING, MASS.

“The Leading New England Nursery.”

HIS list is intended for those whose general knowledge of the more common nursery stock precludes the necessity of a detailed description of the stock offered. All are referred to our GENERAL ILLUSTRATED DESCRIPTIVE CATALOGUE of 200 pages, describing over 2,500 varieties of Trees and Shrubs, the most complete descriptive catalogue of hardy nursery stock in America, with full cultural suggestions, which is mailed free to all regular customers, and will be mailed upon application to others who may apply for the same.

Those using nursery stock in extra large quantities should always correspond with us for special quotations.

All stock sent from the Reading Nursery has been specially grown with a view to the production of an abundance of the best of roots (which end is attained by the most frequent transplanting), and with tops in good proportion. Stock from the Reading Nursery always grows when properly handled.

GUARANTEE.— We guarantee all trees and plants true to name and in good condition on leaving our hands, but do not guarantee them to live under all conditions, nor do we make up any loss whatever due to climate effects or after-culture on the part of the purchaser. In case any mistake should happen in the naming of a plant, we will replace it with the true variety as ordered; but we are not liable for more than its original invoice value in refunding money.

TERMS, CASH.

REMIT.— Large amounts by cashier's check on any bank in Boston or New York. Small amounts by registered letter or postal note on Reading.

ERRORS.— Any errors that may occur in filling orders should be reported to us at once, and immediate correction will be made by us. Complaints entered after the goods have been in the purchaser's hands ten days cannot be entertained.

CORRESPONDENCE.— We are always glad to answer any correspondence in relation to our stock, and to give estimates upon the amount of stock required and the cost of the same in the improvement of large grounds, parks, or cemeteries.

LANDSCAPE DEPARTMENT.— We have very complete facilities for supplying finished planting plans for all improvements to parks, cemeteries, or private grounds. This department is under the charge of a competent landscape gardener, whose work for several years past has given the best of satisfaction to his clients. Personal visits made to give suggestions and advice, or for the purpose of taking data for the formation of complete planting plans, and, when desirable, the superintendence of the work can be carried out by him. Charges for services stated upon application.

The saving gained by special rates alone, that can usually be arranged where the entire work of ornamenting a place is undertaken in a systematic and complete manner, often far exceeds the original cost of plans and advice.

A personal inspection of our stock is requested.

FRUITS.

See our ILLUSTRATED DESCRIPTIVE CATALOGUE of 200 pages for full descriptions of and cultural directions for the two hundred or more varieties of Hardy Large and Small Fruits that we offer. See Novelty List for the latest introductions.

Hall's (<i>L. Halliana</i>). Rapid. All Sum..... 25 2 50	White (<i>W. C. alba</i>). Pure white clusters.... 1 00
The above are nearly evergreen and bear a continuous profusion of showy yellow and white intensely fragrant flowers.	WOODBINE (<i>Ampelopsis quinquefolia</i>). Rapid. Healthy foliage, brilliantly colored in autumn 25 2 50

See Descriptive Catalogue for many other sorts in addition to the above.

Large Specimen Trees, Shrubs, and Coniferous Evergreens can be supplied in numerous rare and common forms, at prices in proportion to their rarity and individual perfection.

A personal inspection of such stock by persons requiring plants for immediate lawn effect is desirable.

CONIFEROUS EVERGREEN TREES.

Our collection of Coniferous Evergreens has been for many years past, and is at present, the most complete in New England, and one of the finest in America.

For full descriptions of and cultural directions for over one hundred and fifty varieties, a part only of our entire collection, see our ILLUSTRATED DESCRIPTIVE CATALOGUE of 200 pages.

ABBREVIATIONS.—Lg., Trees exceeding 50 feet in height at maturity; Med., Trees 25 to 50 feet at maturity; Sm., Trees 10 to 25 feet; Dwf., Shrubs of low yet upright habit; Crpg., Trailing sorts.

All our Evergreens are carefully transplanted at frequent intervals to insure the best of fibrous roots, and the best results in removal are consequent.

ARBOR VITAE (<i>Thuja</i>).		Each.	Doz.	PINE.		Each.	Doz.
American (<i>T. occidentalis</i>). Med.	3 to 4 ft.	\$0 50	\$5 00	Bhotan (<i>P. excelsa</i>). Med.	2 to 2½ ft.	\$1 00	\$10 00
Rapid pyramidal growth.	5 to 6 ft.	1 00	10 00	Dense light-green foliage.	2½ to 3 ft.	1 50

				Irish (<i>T. b. fastigiata</i>). Sm. Columnar.		75	
				Japanese (<i>T. cuspidata</i>). Dwf.	9 to 12 in.	1 25	
				Rare. Perfectly hardy.	1 to 1½ ft.	2 00	

See Descriptive Catalogue of 200 pages for many other sorts in addition to the above.

HARDY HERBACEOUS PERENNIALS.

Of these we have the finest collection in the country, embracing over thirteen hundred catalogued sorts, which, however, comprise but part of our entire collection.

Below we describe those sorts, which we can most highly recommend, embracing as they do the cream of our entire collection for free-blooming effect; and all are perfectly hardy, and, once planted, increase in size and blooming effect yearly, and require but one purchase to have for all time.

We have indicated the height to which they commonly attain in the flower-border, as well as their blooming season, to assist in selection.

ACHILLEA the Pearl. 2 ft. All sum. Each. Doz.

See Descriptive Catalogue for many other sorts.

STREET SHADE TREES.

Of these we have a very fine supply of clean, thrifty transplanted stock, in best possible condition to produce quick results. We invite an inspection of our stock, which will be found to compare favorably with any to be found elsewhere. Special rates given in extra large quantities. In many cases we are able to supply a limited quantity of very extra heavy trees for immediate effect; these trees may vary from 12 to 20 feet high, and from 3 to 8 inches in diameter. Price upon selection.
